Metoda inversa pentru simularea v.a.

- Capil v.a. continue

I Aven veroie sa F (funçtia de repartite) sa fie date sub o forma explicite

(T) Tie X o v.a. avand o repartitie continua Daca Un Uniform (0,1)

Feste f. de repartité a v.a. continue (continué)

Atunci  $X = F^{-1}(U)$  ore repartite data de function de reportite F.

0BS]: A simula o v.a. insemma a genera o valoare dintre cele posibile conform repartite: sale.

Saca  $X = F^{-1}(U)$  insermina ca  $\mathcal{X} = F^{-1}(U) + \mathcal{X}$ , see se reduce la repolvère ecuatie:

$$u = f(x)$$

In capil nosten:

$$\alpha = f(x) = \alpha = 1 - \alpha = 0$$

(=)  $e^{-2x} = 1-u = -2x = bu(1u)$ (=)  $x = -\frac{1}{2} \cdot bu(1-u)$
